Potential to Boost Exports of Value-Added Vietnamese Pangasius Products to Malaysia

Vietnamese pangasius products consistently rank at the top of the list of preferred white fish in many markets, and Malaysia is no exception. As part of ASEAN, one of the largest free trade regions in the world, exports of pangasius to this market have seen continuous growth in recent years.

The structure of Vietnam's pangasius exports to Malaysia remains predominantly frozen pangasius fillets with HS code 0304. In the first ten months of 2024, exports of this product to Malaysia reached nearly \$24 million, a 18% increase compared to the same period last year.

Additionally, exports of other dried/frozen pangasius products (whole fish, cut pieces, etc.) totaled over \$3 million in the first ten months of this year, marking a 19% rise year-over-year.

In the first ten months of 2024, exports of value-added pangasius products to Malaysia reached over \$1.5 million, a 115% increase compared to the same period last year. Notably, the growth in exports of this product has been impressive month by month: January saw a 526% increase, March increased by 399%, May by 325%, June by 315%, and July by 404%, compared to the same months in 2023.
